

Sustainability Policy

STOMANA Engineering S.A. commits to operate in a way that creates progress towards the UN Sustainable Development Goals. Through this commitment, STOMANA Engineering seeks to help preserve the environmental, social and economic assets that are fundamental for society and important to our long-term value creation. STOMANA Engineering S.A. builds on the contribution of its employees and fully integrates sustainability in their strategy, business plans, operations, aiming to maximize its positive effect by engaging with all business partners.

STOMANA Engineering S.A. provides solutions and knowledge to the customers and business partners, supporting them to reach their sustainability ambitions directly and indirectly via industry initiatives to improve their sustainability performance. STOMANA Engineering S.A. commits to meet society's current and future needs by seeking to provide low-carbon, circular and safe products with production operations that respect their employees, social partners and the environment.

STOMANA Engineering S.A. commits to comply with all applicable laws and regulations and to work against corruption and bribery in all their forms. STOMANA Engineering S.A. has zero tolerance for bribery, fraud, unfair competition and other types of inappropriate business behavior. STOMANA Engineering S.A. pledges to uphold sound business practices in their organization and to promote such practices amongst their business partners.

STOMANA Engineering S.A. is committed to continuously reduce their environmental impact, by focusing on the following areas: climate change, circular economy and conservation of resources, while respecting the quality of the environment and biodiversity.

STOMANA Engineering S.A. commits to take action to combat climate change, as well as preserving natural resources that the companies rely on, promote recycling and circular economy to create more sustainable consumption and production, while at the same time seeking to maximize the utilization of secondary raw materials.

STOMANA Engineering S.A. continuously strives to identify opportunities, risks, and improvement possibilities in the entire value chain from different perspectives, climate change, circular economy, resource management and respect for the environment and biodiversity.

STOMANA Engineering S.A. commits to safeguarding labour and human rights, to promote safe working conditions, mental health and well-being, and giving their employees good learning and development opportunities in their work.

STOMANA Engineering S.A. commits to treating all people with respect, to working against discrimination and harassment in all its forms and to being an inclusive organization, which respects individual characteristics such as gender, age, sexual orientation, nationality, religious and political beliefs. STOMANA Engineering S.A. strives to develop their employees to their fullest and to attract new talent in order to create a diverse and inclusive workforce with the right competencies.

Sustainability and more specifically environmental, social and governance issues, have many challenges, risks and opportunities in constant development. STOMANA Engineering S.A. is committed to report on sustainability policies, targets and progress made and to engage with all stakeholders across the value chain to better understand how they can continuously improve their sustainability performance and contribute to a more sustainable world.

Accountability and responsibility to act in a socially responsible and sustainable manner is everyone's responsibility at STOMANA Engineering S.A. Responsibility for the implementation of this Policy lies with the Executive Director of the company.
